

WORLDQUANT

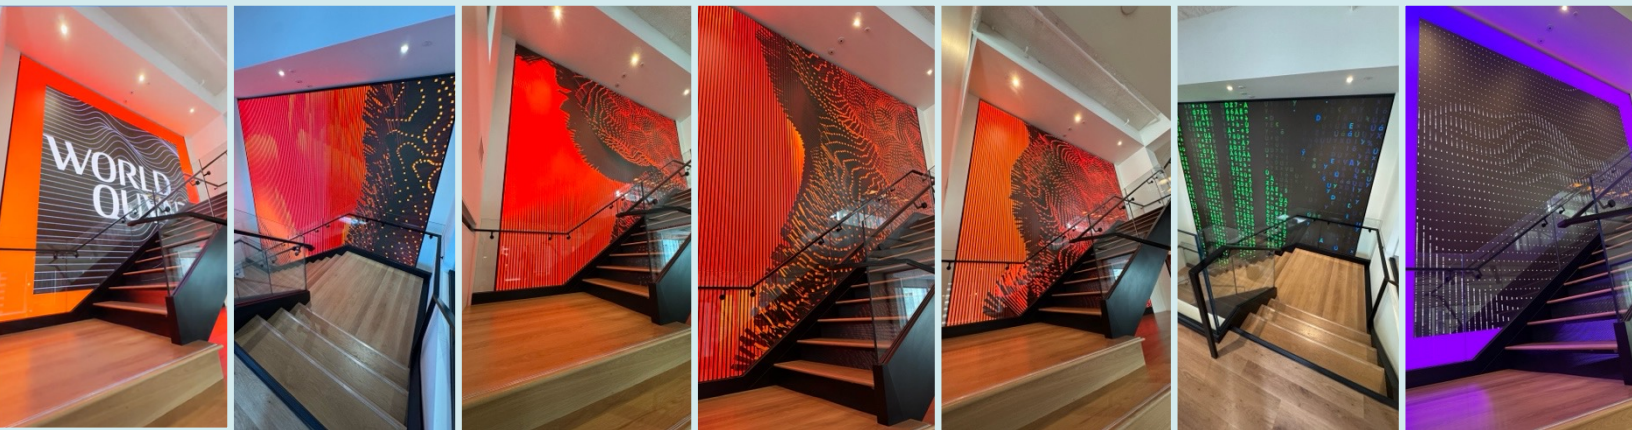

399 PARK AVE | NEW YORK | NY 10019

WorldQuant had a vision - a state-of-the-art office designed to inspire collaboration, creativity, and innovation at every corner. Located in the heart of Manhattan, their new space features thoughtfully designed areas like the Quant Café and the Neuron Activation Pod, all geared towards fostering interaction and sparking groundbreaking ideas. By collaborating with Tad and Planar, A-V Solutions was able to fully support their vision and thrilled to deliver.

COLLABORATIVE DESIGN AND EXECUTION

A centerpiece of this project was the two-story LED video wall. Working closely with Planar, we carefully designed and installed this striking visual display to serve as more than just a decorative element; it's a communication hub. The wall connects the firm's teams through dynamic graphics, real-time company insights, and engaging visual content. From sharing market analytics to broadcasting organizational updates, this installation plays a pivotal role in keeping WorldQuant informed and aligned.

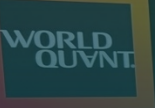

But our work didn't stop there. Each corner of the WorldQuant office is integrated with cutting-edge audiovisual technology. From small, focused huddle rooms to fully equipped boardrooms, every space was designed with both functionality and innovation in mind.

ADVANCED AUDIOVISUAL SOLUTIONS

Conference Rooms

We outfitted multiple conference rooms with sleek, user-friendly solutions that raise the bar for team collaboration. For example, the medium and large conference rooms feature DTEN D7X all-in-one displays, Crestron room reservation panels, and DTEN Mate PoE control systems for seamless operation. Video and audio configurations were expertly implemented to ensure crystal-clear communication, whether hosting internal meetings or global virtual collaborations.

Specialty Rooms

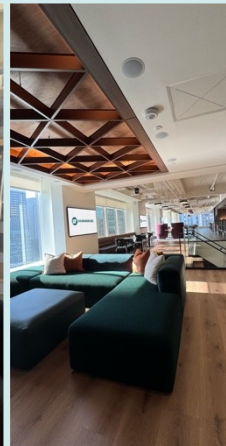

The Quant Café and the Neuron Activation Pod - unique to this office - embody creativity and team interaction. These spaces are equipped with solutions like suspended pendant speakers, integrated ceiling microphones, and high-resolution Samsung displays that keep both form and function in perfect harmony.

The boardroom, in particular, stands out with its dual interactive displays and advanced video conferencing capabilities. Whether participants are physically present or joining virtually, the room is designed to accommodate collaboration on every level. Integrated cameras provide speaker tracking to enhance the user experience, while the state-of-the-art control panel puts every function at your fingertips.

Dynamic Specialty Features

One of the project's highlights is the integration of a Planar LED wall in the office's stairwell. This floor-to-ceiling digital installation transforms a high-traffic area into an immersive, brand-forward space. Using Planar's DirectLight Pro technology, this two-floor display delivers brilliant, precise imagery and serves as a testament to WorldQuant's dynamic nature.

Additional custom integrations, such as soundscaping speakers in the library/lounge and wireless microphone systems in meeting spaces, make WorldQuant's office a technological masterpiece. All systems are scalable, ensuring their functionality evolves alongside the firm's needs.

COMMITMENT TO EXCELLENCE

At A-V Services, our mission is to bring innovative solutions to life. With decades of expertise in designing advanced audiovisual systems, we were well-positioned to turn WorldQuant's vision into reality. This project reflects the perfect marriage of functionality and aesthetic design, with technology integrated seamlessly into every space.

From concept to implementation, this partnership underscores our unwavering commitment to quality. By combining innovative design, expert engineering, and precise execution, we've helped create an environment that amplifies collaboration at every level of the organization.

WorldQuant's new Manhattan office isn't just a workspace; it's a dynamic ecosystem that inspires meaningful interaction and cutting-edge ideas. And we're proud to have played a pivotal role in making it possible.
